

## **Medical Association**

I have participated in numerous leadership workshops and have arranged a number for Ontario medical students and Ontario doctors. I am happy to tell you that your session was, by far one of the most impactful in recent memory.

I was impressed with your speaking abilities and particularly impressed with your four piece personality model. That model provided for a great interactive sessions with the students and will no doubt help them communicate more effectively in every day life as well as with media and with politicians.

I look forward to working again with you in the future.

**Patrick Nelson**  
**Director, Public Affairs and Communications**
