

## Promotional Products Industry Presentation Feedback

This was a very exciting and interesting seminar. I really enjoyed the reality of all the examples associated between business and personal. A lot of times we know what we need to do but never actually do them. Thank you very much for bringing my focus back and making me realize what is important to me not everyone else. Excellent Speaker!

This was a great course. Finding out about the person; taking a personal interest in them and making them feel special...listen to what they have to say.

Thank you
